01 · EXECUTIVE INTRODUCTION

About YJ Technosoft Private Limited

YJ Technosoft Private Limited is a technology and software development company focused on building digital solutions that help organizations improve operational efficiency, streamline workflows and modernize business processes.

Incorporated in 2021 and headquartered in Kawardha, Chhattisgarh, the company's project portfolio spans government digitization, enterprise application development, healthcare technology, business communication platforms, legal case management, real estate CRM, procurement support, human resources and payroll systems, and digital marketplaces.

YJ Technosoft approaches software development with an emphasis on understanding operational requirements, designing practical technology solutions, developing user-oriented applications and supporting digital implementation. Its capabilities encompass web and mobile application development, backend systems, API integration, database design, workflow automation and application deployment.

The company works with government institutions, enterprises, service providers and growing businesses to translate operational requirements into reliable, maintainable software solutions.

> **Core focus:** practical technology, process digitization and custom software solutions aligned with organizational needs.

Company at a glance

Legal name	YJTECHNOSOFT PRIVATE LIMITED
Corporate Identity Number	U72900CT2021PTC012188
Year of incorporation	2021
Registered office	Rajmahal Chowk, Kawardha, Chhattisgarh PIN code
Leadership	Director name(s)
GSTIN	GSTIN, if to be published
Delivered projects in this profile	12, across 10 sectors

02 · WHO WE ARE

Mission, Vision & Capabilities

Mission

To make dependable technology accessible and affordable for every business and public institution.

Vision

To be the most trusted technology partner in Central India, known for quality, transparency and long-term support.

What we do

Government Digitization

Digitizing registers, complaints and departmental workflows with role-based access and audit trails.

Enterprise Applications

HR, payroll, CRM, procurement and operations software built around how the organization actually works.

Web & Mobile Products

Customer-facing portals, marketplaces and Android / iOS applications with admin panels.

Communication Platforms

SMS, email and WhatsApp Business messaging integrated into business workflows.

Integration & Automation

API integration, payment gateways, notifications and scheduled workflow automation.

Hosting & Support

Deployment, domains, hosting, SSL, backups and annual maintenance support.

Sectors served

Sector	Platform(s)	Sector	Platform(s)
Government & Policing	CGP Digital — Raigarh Police	**Real Estate**	Real Estate CRM
Healthcare	Heal Mirror	**Procurement**	Tender Support Platform
Communications	ASP Utility — SMS & WhatsApp Business	**Workforce**	HR & Payroll System · Job Portal
Monitoring & Compliance	Tobacco Monitoring Platform	**Consumer Services**	Cloud Tiffin · All In One Service
Legal	Litigation & Legal Chamber Platform	**Advertising**	AdOnRoute

Digitizing Public Service Workflows

Government offices run on registers, files and follow-ups. YJ Technosoft builds systems that move those records into secure, searchable digital workflows, without forcing staff to change how the work itself is done.

Our approach for public institutions

- **Understand the register first.** Each system starts from the physical registers, forms and reporting formats already in use.
- **Role-based access.** Officers, operators and supervisors see only what their role permits.
- **Audit trails.** Entries and changes are recorded so records remain accountable.
- **Search and retrieval.** Archived records are retrievable by number, date, name or category in place of manual file search.
- **Reports in familiar formats.** Output matches the formats officers already submit.
- **On-site training and support.** Staff are trained on the system and supported after go-live.

Typical modules

Complaint registration
Digital intake, numbering, status tracking and disposal.

Digital registers
Station / office registers maintained electronically.

Archiving
Secure storage and retrieval of historical records.

Departmental MIS
Dashboards and periodic reports for supervisors.

Case & court tracking
Case status, hearing dates and follow-ups.

Alerts
SMS / email notifications for pending actions.

> **Featured case study:** CGP Digital, a complaint registration, archiving and police-station register management system delivered for Raigarh Police (next pages).

FLAGSHIP CASE STUDY · GOVERNMENT

CGP Digital — Raigarh Police

Client	Office of the Superintendent of Police, Raigarh, Chhattisgarh
Sector	Government · Law enforcement
Solution	Digital complaint registration, archiving and police-station register management
YJ Technosoft's role	Development / implementation / deployment / maintenance (confirm)
Delivery year	Year
Users	Police stations / offices / user roles covered
Status	Completed and delivered

The challenge

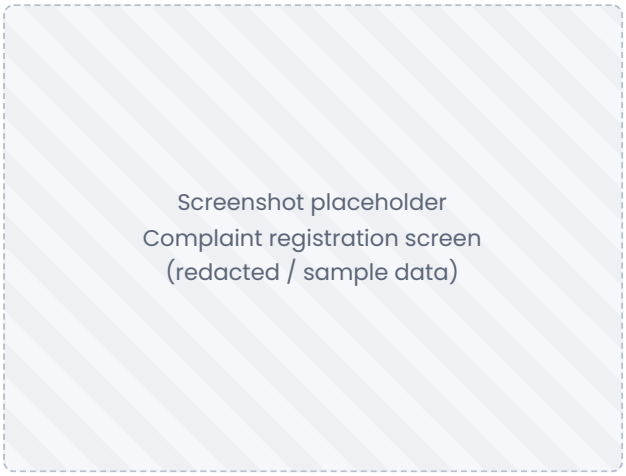

Police stations maintain complaints and a range of statutory and administrative registers on paper. Paper records are slow to search, difficult to consolidate for supervisory review and vulnerable to wear and loss over time.

The solution

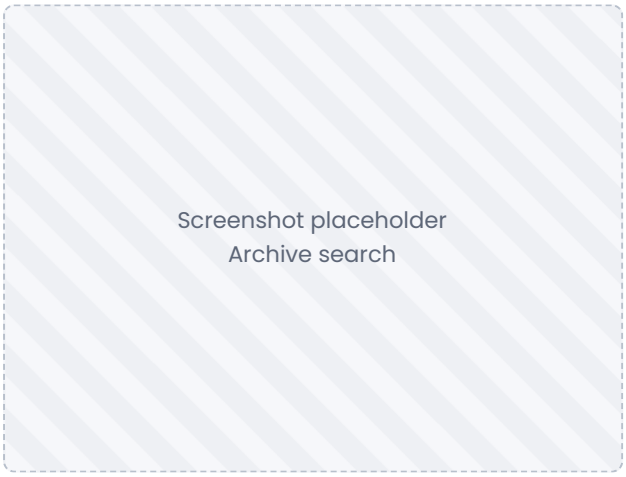

- **Complaint registration:** structured digital entry of complaints with unique numbering and status tracking.
- **Register management:** police-station registers maintained in digital form.
- **Digital archive:** historical records stored securely and retrievable through search.
- **Role-based access:** separate permissions for station staff and supervising officers.
- **Reports:** summaries for supervisory review. confirm report types

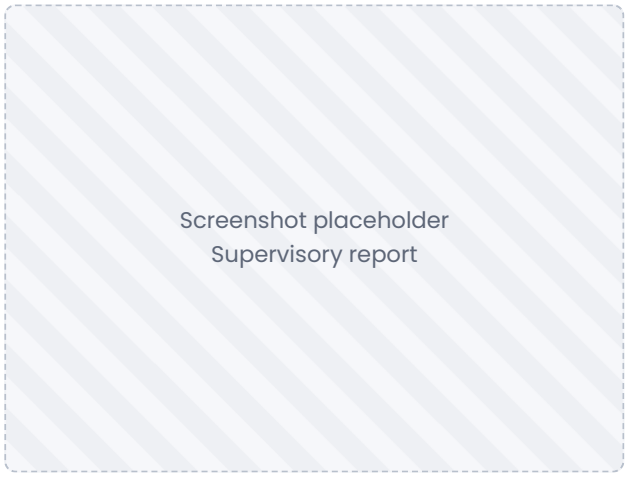

FLAGSHIP CASE STUDY · GOVERNMENT

CGP Digital — In Practice

Delivery workflow

#	Stage	Activity
1	Requirement study	Review of existing registers, complaint forms and reporting formats
2	Design	Data structure, user roles and screen design mapped to the registers
3	Development	Application build with search, archiving and reporting
4	Deployment & training	Installation and staff orientation confirm
5	Support	Post-delivery support and maintenance confirm

Evidence on file before issue: work order or completion letter, client reference, and redacted screenshots. No personal data of complainants appears in this profile.

04 · ENTERPRISE APPLICATION DEVELOPMENT

Architecture & Engineering

Every platform in this profile follows the same architecture: a responsive web or mobile front end, a secure API layer, a relational database and an administrative back office.

Front end

Responsive web applications and admin panels; Android and iOS apps.

React · Vite · Tailwind CSS · Flutter · React Native

Back end & APIs

REST APIs with token-based authentication and role-based authorization.

Node.js · Express · JWT · PHP confirm

Data

Relational database design, reporting queries and scheduled backups.

MySQL · MariaDB

Integrations

Messaging, payments, document generation and notifications.

SMTP · SMS gateways · WhatsApp Cloud API · UPI / payment gateways · PDF generation · Web push

Capabilities

- Custom web application development
- Android & iOS app development
- Admin panels and dashboards
- Database design and migration
- API design and third-party integration
- Workflow and notification automation
- Document and report generation
- Deployment, hosting and maintenance

Healthcare & Communications

02 Heal Mirror

HEALTHCARE

A healthcare platform connecting doctors and patients for appointment booking and remote consultation.

- Doctor discovery and appointment scheduling
- Audio and video consultation workflows
- Patient and doctor accounts with consultation history

Client: name or "confidential" · Year: year · Platform: web / Android / iOS

03 ASP Utility — SMS & WhatsApp Business

COMMUNICATIONS

A business messaging platform for SMS campaigns and WhatsApp Business communication.

- Bulk and transactional SMS campaigns
- WhatsApp Business messaging workflows
- Contact lists, templates and delivery logs

Client: name or "confidential" · Year: year · confirm implemented features and integrations

Screenshot placeholder — Heal Mirror appointment screen & ASP Utility campaign dashboard

Monitoring & Procurement

04 Tobacco Monitoring Platform

MONITORING

A monitoring and reporting platform supporting field activities and compliance tracking.

- Recording of monitoring activities confirm activities
- Reporting workflows and consolidated dashboards
- Role-based access for field and supervisory users

Client / department: name or "confidential" · Year: year · Environment: deployment context

07 Tender Support Platform

PROCUREMENT

A platform for discovering government and private tenders and managing bid preparation.

- Tender discovery and search
- Opportunity tracking and deadlines
- Bid-management support

Client: name or "confidential" · Year: year · Sources: confirm supported portals

Screenshot placeholder — monitoring dashboard & tender search

Consumer Platforms

09 Cloud Tiffin

FOOD-TECH

A meal subscription platform connecting customers with tiffin and food vendors.

- Customer meal subscriptions and plans
- Vendor management
- Order processing and delivery tracking

Client: name or "own product" · Year: year

11 All In One Service

MARKETPLACE

A multi-service marketplace for booking local service providers.

- Customer booking across multiple service categories
- Service-provider onboarding and management
- Order and booking management for administrators

Client: name or "own product" · Year: year

Screenshot placeholder — Cloud Tiffin subscription & All In One Service booking

Recruitment & Advertising

10 Job Portal

RECRUITMENT

A recruitment portal connecting employers and job seekers.

- Job listings and search
- Employer and candidate accounts
- Applications and recruitment management

Client: name or "own product" · Year: year

12 AdOnRoute

AD-TECH

An outdoor advertising platform for discovering billboard sites and managing campaigns.

- Map-based billboard discovery
- Advertising inventory management
- Campaign management

Delivery scope: completed scope · Ongoing operations: describe separately if any · Year: year

Screenshot placeholder — job listing & billboard map

Legal & Property Technology

05 Litigation & Legal Chamber Platform

LEGALTECH

A practice-management platform for advocates and legal chambers.

- Litigation and case tracking
- Hearing schedules and reminders
- Client records
- Legal document management

Client: name or "confidential" · Year: year

06 Real Estate CRM

PROPTECH

A CRM for property developers and brokers to manage inventory and the sales pipeline.

- Property inventory
- Customer lead capture
- Follow-up scheduling
- Sales pipeline dashboard

Client: name or "confidential" · Year: year

Screenshot placeholder — hearing calendar (sample data)

Screenshot placeholder — lead pipeline

Workforce Technology

08 HR & Payroll System

ENTERPRISE

A workforce administration system covering the employee lifecycle from joining to payroll.

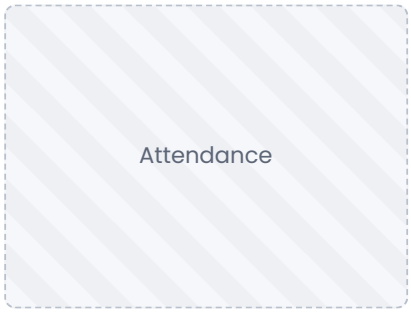

- Employee records and documents
- Attendance with check-in / check-out
- Leave and holiday management
- Payroll and payslip generation
- Offer, appointment and experience letters
- Task and daily work reporting

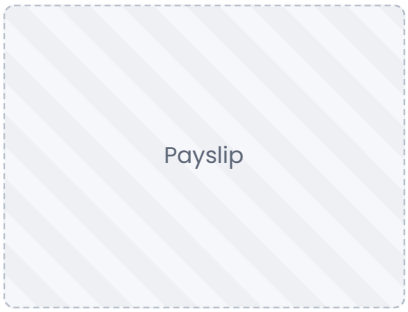

Client: name or "confidential" · Year: year

Why it matters

Small and mid-sized organizations often manage attendance in registers and payroll in spreadsheets. A single system keeps employee data, attendance and salary calculation consistent, and produces payslips and HR letters in the organization's own letterhead.

Automation & Intelligent Workflows

YJ Technosoft applies automation where it removes repetitive work: notifications, scheduled reminders, document generation and messaging.

Delivered automation in the portfolio

Capability	Where it is used
Automated messaging	ASP Utility (SMS & WhatsApp campaigns)
Scheduled reminders	Hearing schedules (Legal Chamber), follow-ups (Real Estate CRM)
Automatic document generation	Payslips and HR letters (HR & Payroll)
Tender opportunity tracking	Tender Support Platform

AI-enabled solutions

> List only delivered AI features, with the project they belong to — e.g. document classification, chatbot, OCR, recommendations. Leave this section out if none have been delivered yet.

This page deliberately separates delivered capability from future direction. AI features are listed only when they are in production in a delivered project.

How We Deliver

#	Phase	What happens	Output
1	Discovery	Study of current process, registers, forms and users	Requirement document
2	Proposal	Scope, timeline and commercial proposal	Quotation / agreement
3	Design	Database design, user roles and screen layouts	Design approval
4	Development	Phase-wise build with regular demonstrations	Working modules
5	Testing	Functional testing with sample data and user acceptance	UAT sign-off
6	Deployment	Installation on client server or managed hosting; SSL and backups configured	Live system
7	Training	Orientation for operators and administrators	Trained users
8	Support	Bug fixing, updates and annual maintenance	AMC / support plan

Delivery principles

- Phase-wise delivery with a clear timeline in every quotation
- Client sees working software early and often
- One team from requirement to support
- Documentation and admin training at handover

Protecting Records

Systems built for public institutions and businesses hold sensitive records. Security controls are part of the design, not an add-on.

Access control

- Individual user logins
- Role-based permissions
- Hashed passwords; token-based sessions

Data protection

- HTTPS / SSL on all deployments
- Scheduled database backups
- Private storage for uploaded documents

Accountability

- Audit trails on record changes
- Message and activity logs

Confidentiality

- NDA available for every engagement
- Client data never used in marketing
- Redacted samples only in demonstrations

Review note: keep only the controls the company follows in practice. Add certifications (e.g. ISO 27001) only if held.

Working With Us

Custom Development

A system built to your requirements: fixed scope, phase-wise milestones and full handover.

Implementation

Configuration and deployment of an existing YJ Technosoft platform, adapted to your workflows.

Maintenance & AMC

Annual maintenance covering bug fixes, updates, backups, security patches and user support.

Also available

- Website and portal development
- Mobile app development
- Domain, hosting and business email
- Digital marketing support
- Technical consulting
- On-site staff training

Commercial terms

Every engagement starts with a written quotation that sets out scope, timeline and payment milestones, followed by an agreement. Standard agreements are available for software development, website development, AMC, hosting and NDA.

CONTACT

Let's build it together.
